Greetings Fellow Traders, your about to start a journey to learn how to trade a simple forex system like a business. Like the site stated, with no more than a maximum of 2 hours per day, it is possible to earn a supplemental, part-time or full-time income with the 30 Pips Daily forex trading system. OK, that's all the time I will waste. Let's get down to where the rubber meets the road and see how we trade this system.

The next paragraphs are in blue text. Basic loading of the system on to your MT4 platform by the numbers. This is mostly for beginners or a refresher but if it is old stuff for you, just scroll down and bypass it.

1. At the top of the MT4 chart itself, click on "file"
2. Then click on "open data folder" in the drop-down and then minimize your whole chart so you just have your "data folder" on your desktop. Then double click on your 30 Pips daily system zip folder to open it and then you will have both folders side by side.
3. In your "data folder" double click on the "template folder" to open it. Then double click on the "template folder" in the system zip and drag and drop or copy and paste the template into your data's "template" folder. Then click the back arrow on both the data folder and the system's zip folder.
4. Now double click on the "MQL4" and double click on the "experts" folder both in the data and the systems zip. Now drag and drop the Broker\_Nightmare into the data's "Experts" folder. Now again click the back arrow on both folders.
5. Double click on the "Indicators" folder in the data folder. Now drag and drop your 8 indicator files in to that "Indicators" folder. (Do not dag this User Guide into it. Now close your data folder and your zip folder and the MT4 platform. You will still have the whole system in the zip incase you lose something or whatever.
6. Open your MT4 platform again. Open the gbp/usd chart from the left side and put it on the M15 time-frame, then click on the little square icon on the top of the chart beside the little clock. In the drop-down showing you your

different template files, click on the "!\_30\_PipsDaily\_v2". Do the same thing with the eur/usd pair and you are ready to trade (or start your new business!)

7. [CLICK HERE](#) for you guys that prefer to see this done on a 6 minute video.

You probably got it figured out from the site but here again is how you trade this.

The red dotted vertical line is the London open. You won't see the writing in the system but the red dotted is London open, the blue dotted is N.Y. Open and the gray dotted is the broker's close and opening of the market day.

On the London opening line, we've had a prior up arrow. The custom Heiken Ashi candle is the right color along with the left and right digits and the trend line is aqua but quite flat, the aqua trig line has barely crossed over and virtually no separation and neither the red RSI or the yellow Mom has crossed over going up on their respective dotted lines. No trade yet.

On the first white vertical line, the H.A. Candle is blue but with coral digits, the aqua trend line is flat and the aqua trig line is flat. Also the RSI and Mom haven't confirmed. Any of these things would warrant no trade yet.

The second white vertical line, there is a possible trade if your anxious but I don't like the fact that the yellow Mom has just barely crossed the yellow dotted line.

The next red vertical line, all ducks are in a row as pointed out with the little white arrows and a winning trade was generate and entered. It was taken out with the trade manager

automatically for a 30 pip profit, \$300. bucks on a standard contract, \$600. on a double. If you started monitoring your business 15 minutes before the opening, the whole thing would have taken about 1 hour and 15 minutes of your time.

Now here is a [LINK](#) to show you how to setup the trade manager on a trade. It is not the right time to trade so I'm just going to do it on my demo account to show you exactly how it works.

Here are two other training/explaining links. These were on the site also : [LINK 1](#) and [LINK 2](#)

That's about it folks. No filler here, just need to know info. Just remember, please treat it as a business and it will be good to you. Start with a demo, get the feel for the system, then have at it on a live account.

If you don't have a good broker. For my part, I can honestly recommend **TRADERSWAY**. I've been trading with them for quite a few years and never had any problems with anything. If you sign-up with my link, I will get a small commission. (disclaimer).

If you have any problems, I am available for unlimited email support. I usually answer within an hour or so – never more than 24 hours after receiving your email. Contact here for best results : [admin@tradersniche.com](mailto:admin@tradersniche.com) Relace (at) with @ This is to avoid bot spam emails. Happy Trading. Ciao. Cheers, Trader Ed
