

4EX TRADER

System Manual

Risk warning

Before you begin trading on Real account please carefully consider your investment goals, risk and experience you have. It should be noted that Forex is a leverage based market. It should be remembered that leverage can work both in your advantage and disadvantage as well. Therefore there is high risk of losing a part or all of your financial input placed on your account and because of that you should remember to trade with the amount of money which you can lose without taking any influential financial damage.

Disclaimer

- Restart your MT4

- Open your favourite chart. Press the right mouse button and pick 4EX TRADER template depending on your risk appetite.
- 4EX SCALPING (Provides fastest signals with increased risk and also increased profit potential. Use it for scalping).
- 4EX DAYTRADING 1 (Provides balanced and stable signals. Perfect for most traders. Use it for typical daytrading or swingtrading).
- 4EX DAYTRADING 2 (Provides faster daytrading signals. It's also very versatile and can be used by most traders. Use it for typical daytrading or swingtrading).
- 4EX SWINGTRADING (Provides slower but more filtered signals. This is mode is recommended for swing/position traders, or simply for traders who do not have much time for checking the charts).

SYSTEM OVERVIEW

System contains 3 main indicators:

1. Entry Indicator (BUY / SELL Signals).
2. Pairs Analyzer.
3. Dashboard Info (basic data like pair, spread, range etc.).

ENTRY EXAMPLE (SELL MARKET)

System signals are pretty straightforward. White arrows means sell market. We look for sell signals only.

When market trend will change, you will get main sell signal. After some time if the market will keep it's direction, you will also receive additional sell signals (smaller white arrows).

Every of those arrow are valid sell signal.

ENTRY EXAMPLE (BUY MARKET)

Buy signals works pretty much the same way. When the market will switch to the buy market, you will receive big blue arrow (main buy signal). When the market will move the same way, after some time you will also receive additional buy signals (smaller blue arrows).

STOP LOSS

Stop loss should be placed:

- Below the last swing low for BUY trades
- Above the last swing high for SELL trades

TAKE PROFIT

Take profit should be placed:

- R:R=1:1 when market moves slowly
- R:R=2:2 when market moves fast

PAIRS ANALYZER

Pairs analyzer is a very useful tool that shows the best trending pairs on the whole market.

Top pairs are of course the strongest (buy market), bottom pairs are the weakest (sell market) and you can also spot ranging pairs that have currently no direction (pairs that are in the middle of the dashboard).
