RISK NOTICE

Forex Trading is currency trading transactions from different countries towards each other. Currency is exchanged for conducting business and outside trade country, which makes the forex market the largest financial market in the world. Forex trading done through a forex broker or market maker and is now considered a common form from investment. The Forex market is a 24 hour global market, which allows forex brokers conduct trades starting when the markets open in Australia on Sunday and ending on England on Friday. Today's traders also have the flexibility to place trades Forex online. Some of the benefits of forex trading are high liquidity and low transaction fees. It also allows traders to trade the market use leverage. In other words, traders can trade with any amount of money which is more than the amount of money in their account. However, leverage can increase profits and at the same time increase losses as well.

CFDs, or Contracts For Difference, are derivative products that allow the traders to participate in the price movement of such a stock or index without company share ownership. This is a simple trading option for trading price changes across multiple commodity and equity markets with leverage and execution live. The advantages of trading CFDs include lower margin requirements and easy access to broad market positions. Another popular form of investing in gold, too known as a safe haven asset for investors. Gold futures are a hedging tool for commercial producers and consumers of gold. The price of gold is driven by supply and demand as well speculation

Trading in the currency market carries high risks and opportunities. If You want to invest in trading in the currency market, you first must understand and understand futures trading activities as well as the contents of the Agreement and Transaction Rules

By using DJ Market Pro, you acknowledge that you are an adult who approves and understands your decision.

ABOUT DJ MARKET PRO

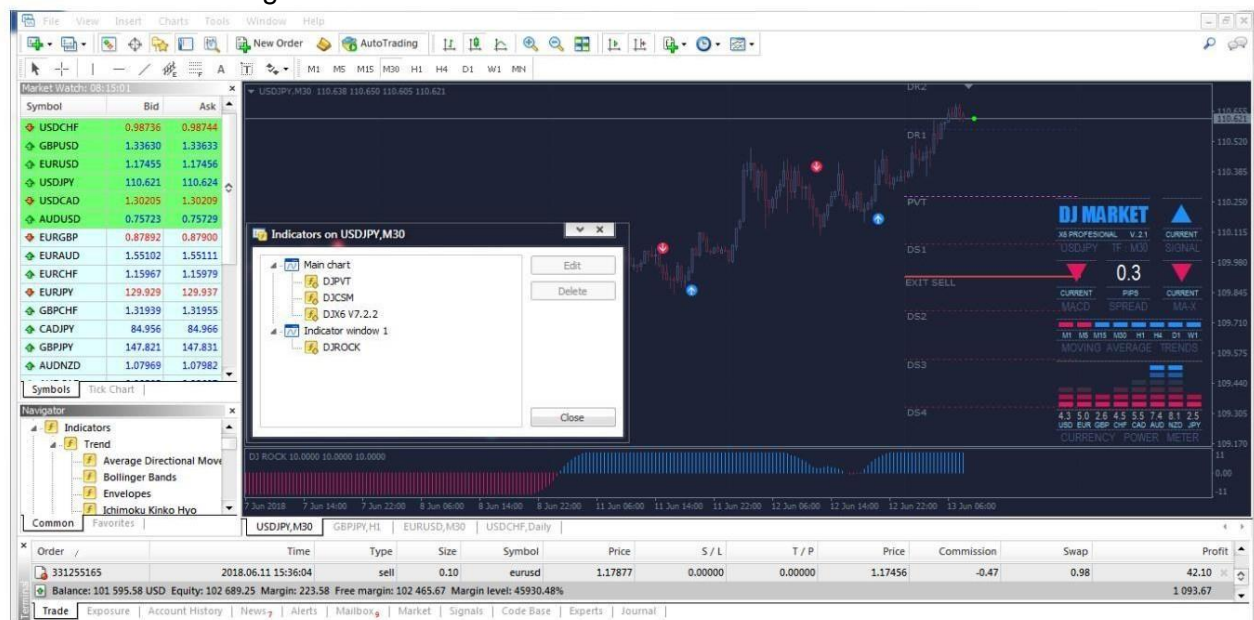

DJ MARKET PRO is a trading system that can analyze movements market technically accurately. This indicator is simple and easy to use or understood, if used correctly, can increase the success rate your trading and with maximum profit.

DJ market pro will provide automatic signals and alerts to users complete with stop loss and take profit so the user just continues signal recommendations and alerts for manually open positions. This indicator can you use it forever without rent fee. DJ market pro can provide a new perspective and of course a tool that provides benefits.

That way slowly but surely you will also be able to have it consistent income from forex and even maybe someday you will be able to have an extraordinary income from forex. Send regards for success !

DJ MARKET PRO COMPONENTS

DJ MARKET PRO uses four indicators specially made for the platform Metatrader 4 trading.

1. DJPVT

Explanation of Pivot Points

The Pivot Points indicator is a simple pivot indicator that will give you basic information such as Daily Pivot Points, Support 1, Support 2, Support 3, Resistance 1, Resistance 2 and Resistance 3.

The advantage of the pivot point compared to other Support & Resistance methods is that every trader around the world uses the same formula to calculate pivots so that pivots are the level of market psychology most often used by traders to make decisions.

Pivot Point Image [DJ Market]

The basic principles of Pivot are :

- Usually when the price is opened above the pivot then psychologically the price will go up (although not always) and vice versa. • Prices tend to try to penetrate pivot levels, support & resistance.
- If the momentum is strong, the price will penetrate the pivot towards support or resistance, but if the momentum is weak, the price will reverse. • If the price doesn't touch the pivot, the price usually tends to stay away from the pivot.

Range Daily Explanation

Daily Range Is the High and Low Movement Range to determine the maximum exit trade level, including take Profit and Stop trades in one day, this level will change every day. Besides that, this indicator is also useful so that we don't over trade.

Range Daily [DJ Market PR0] Images

2. DJ X6

The DJ X6 indicator in the form of a point / arrow can be used to determine the trend that will take place. This indicator does not repaint, DJ X6 issues alerts when there is a change in trend/new signal.

3. DJ CSM

DJ CSM provides visual information on current trends based on an analysis of more than 5 indicators that are displayed visually on the chart, you can adjust the settings of all indicators in the input parameters.

DJ CSM displays the following information in the lower right corner of the chart: - **Forex Currency Strength Meter** is a type of Forex indicator that serves to measure the strength index of a currency against other currencies. With this indicator you don't need to open many charts at once to do trend analysis (correlation between currencies)

- **Moving Average Trends** is an Indicator that displays the average value of price data in the time periods M1, M5, M30, H1, H4, D1 and W1.
- **MACD** is a technical indicator that can help you to identify changes in direction.
- **MA-X** indicator on the basis of a 5-period SMA crossover (period can be changed).
- **Volume Buyer & Seller** displays the average volume of buyers and sellers, helps you see the power of buyers and sellers.
- **Spread** This indicator can be relied upon to find out changes in spreads. For those of you who need information about spreads, spread changes, or there are periodic changes, then this indicator is right for you. Knowing the spread is an important factor before you open a position. Because when the spread widens or suddenly the opening time of the position immediately floats 15 points or 30 points, of course

4. DJ ROCK

DJ ROCK appears in the sub-window Providing Trend Information in the Form of a Histogram
