

MasterScalper PRO Version 2.6 is an advanced, fully automated Expert Adviser developed to trade with efficiency and accuracy. It is equipped with a unique algorithm that analyses the market condition to find the best entry points. With this algorithm, the accuracy of each trade open is guaranteed to hit its target in the shortest possible time. In short, this is a "quick in, quick out" system which is efficient to low spread accounts like ECN.

This expert has an optional martingale feature which you can turn ON/OFF. What is unique about this system's algorithm is that it was able to filter the way how martingale should perform. It will only activate martingale trades on a trend condition. Based on live account performance, the martingale feature of this system is not risky.

RECOMMENDATIONS:

- Account Type: ECN (low to 0 spreads)
- Account Leverage: 1:500
- Account Capital: Minimum - \$100 Recommended - \$300
- Lot Size: 0.01
- Lot Multiplier: 1.3 to 1.5
- Currency Pairs: Any but tested consistently on EURUSD, GBPUSD, EURJY, and GBPJPY
- TimeFrame: 1HR

SETTINGS:

GENERAL SETTINGS:

- SubscriptionCode - Your license code for premium users.
- UseMarti - When set to TRUE, it enables the EA to open trade based on the typical Martingale Strategy.
- LotSize - Sets the initial lot size to open.
- TakeProfit - Sets the TP of the main strategy trades. The recommended is 50 points.
- StopLoss - Sets the SL of the main strategy trades.
- PriceGap - Sets the gap where the Martingale Strategy will start to open a trade.
