

How to Install NightProfit 2.0 on MT4 (or MT5)

Step 1: Transfer the files

1. Open the email you received and **download the ZIP file**
2. **Extract the ZIP file** on your PC
3. **Move Night-Profit_License.key to your Desktop.** Keep it on the same PC on which you run NightProfit to avoid additional charges.
4. Select **NightProfit2.ex4**, then right click and click “Copy”
5. **Open MT4 (or MT5)**
6. Click on the “**File**” tab found on the top navigation menu
7. Then, click on the “**Open Data Folder**” on the drop-down menu

8. Double click on the “**MQL4**” (or **MQL5**) folder to open it.

10. Click “**Paste**” to paste the NightProfit2.ex4 (or .ex5) file inside the “**Experts**” folder

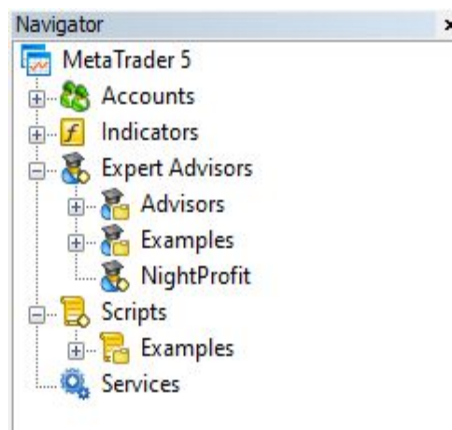

11. **IMPORTANT**: Restart MT4 (or MT5).

Step 2: Install the EA on the chart

1. **Open MT4 (or MT5)**

2. You should see “NightProfit2” under the “Navigator” panel on the left side of your trading platform, under “Expert Advisors”. If not, click on the “Plus” sign and the robots available for use will be displayed.

a. **TIP**: If you still don’t see the bot, refresh the “Navigator” panel, restart your MT4 (or MT5) trading platform and restart your computer.

Install the EA on the MT4 (or MT5) chart by dragging and dropping it onto your preferred currency pair chart.

Step 3: Start trading

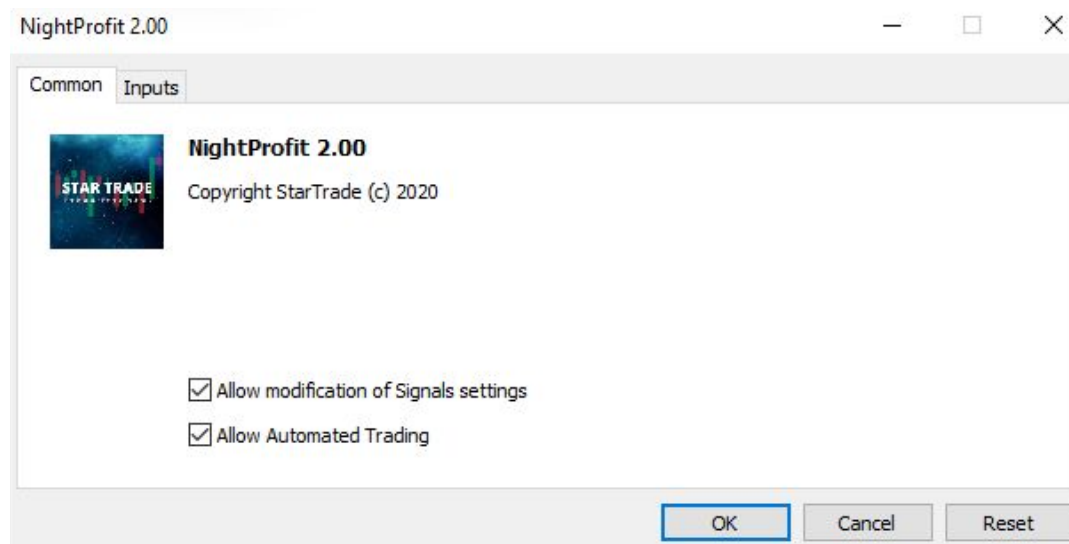

Now double-click the EA or drag and drop it to the chart and the below window appears. Check both boxes in the Common tab and click on OK.

Settings Explanation

We suggest to test and try in Demo to find the best configuration that works with your specific setup and broker. When you are comfortable with the results and how the robot operates, you can switch to the Live mode.

- Minimize Risk: 1 to 10 (1 = highest risk, 10 = lowest risk)
- One trade at a time: true or false (true = more trades, false = less trades)
- Take Profit: we suggest to start with 10.
- Stop Loss: we suggest to start with 10.
- LotSize: we suggest to start with 0.1.
- MagicNumber: random number to use multiple bots at the same time (not allowed by some brokers)

IMPORTANT: Click M1 to change TimeFrame

Click "Autotrading" on the top of MT4 (or MT5).

If the installation is successful, you'll see a **smiling face** on the top right-hand corner of the **MT4 (or MT5) platform**. This indicates that your robot is ready for trading.

It's important to note that before launching your forex robot for live trading, you should try it out under simulated forex trading conditions. This way, you can be able to tell its profitability and make appropriate adjustments to maximize its performance.

Installation FAQ

I'm getting "Error:0" on MT4. How can I solve it?

Contact your broker and ask to change the minimum Lot Size to 0.01.

What's the difference between Fast and Slow presets?

Fast and slow depends on the Time Frame. Fast less than 1 hr. Slow more than 1 hr. Try in demo and see which one works best with your setup and broker. It can vary.

What Settings should I use?

We suggest testing and try in Demo to find the best configuration that works with your specific setup and broker. When you are comfortable with the results and how the robot operates, you can switch to the Live mode. You can also use our Presets, you can find them in the folder "Fast" and "Slow".

The bot is not running. What can I do?

We suggest contacting your broker or try with another account. Often the broker can unlock it and the bot starts to trade immediately.

Other solutions:

- 1) Try with another broker account

- 2) Try with Demo or Live account
- 3) Try with MT4 or MT5
- 4) Check SL and TP values. If you set them too low, your broker may block trades.
